

All current sensors for AC and DC

We make energy measurable and take care of your future

www.mbs-ag.com

CCT 31.3 RMS (Compensation current transformer, MBS All current sensors) Current transformers for the measurement of direct and alternating currents

- For measuring of non-sinusoidal and distorted networks
- As a measuring transducer for the direct input wiring of SPS input cards

Additional accessories:
Snap-on mounting to clip onto
35 mm DIN rail (Art.-no. 53011)

Dimensions:

Bus bar: 30x10 mm
Round conductor: 28 mm
Transformer width: 70 mm
Transformer height: 92 mm
Transformer depth: 48 mm

Applicable technical standards:

DIN EN 50178, 1997
DIN EN 61010-1, 2002
VDE 0160

Electric connections:

$U_H + 0$ (Ground) I_A
Spring clamp terminal
Connection cross sections: 0.08...2.5 mm²

Technical data:

Measuring range:	0...300 A DC / 0...300 A I_{RMS} AC, depends on varieties! (Nominal current ranges adjusted to standard values according to IEC)
Frequency range:	DC, or AC 20 Hz ... 6 kHz, Crest-factor ≤ 4
Current output:	4...20 mA DC, RMS measurement
Max. burden resistance at current output:	$R_B \leq 500 \Omega$ ($U_H = 24$ V DC)
Current limit under overload:	< 25 mA
Accuracy:	$\pm 1,0 \%$
Max. operating voltage U_m :	0,72 kV, U_{eff}
Isolation test voltage:	6,4 kV, U_{eff} , 50 Hz, 5 sec., primary conductor against measuring output / housing
Auxiliary voltage:	24 V $\pm 15 \%$ DC, < 70 mA, external protection via microfuse 250 mA / 250 V, fast!
Step response time (90 % I_{PN} , $di/dt = 100$ A / μs):	≤ 200 ms (typ. 150 ms)
Signal rise speed di/dt :	< 100 A / μs
Isolation class	E
Protection class	IP 20
Operating altitude	≤ 2000 m (DIN EN 61010-1)
Max. temperature of the primary conductor:	100° C
Operating temperature:	-25° C < T_U < +60° C, 0...95% rH, without condensation
Storage temperature:	-40° C < T_L < +90° C

Functions of the CCT 31.3 RMS:

- Electricity is conducted over the magnetic field and is captured by the measuring core. The current induced in the measuring core is proportional to the magnetic flow and is captured by a semi-conductor element. An integrated electronic control unit converts the semi-control signal into a true effective value of the measuring size in proportion to the DC output current signal. The true effective value is calculated by the delta-sigma-method.
- A contactless inductive captured parameter creates a galvanically separated output signal.
- Electrical contact with the secondary circuit of the current transformer is achieved by means of a 4-pole spring-clamp. This clamp is suitable for connection to a flexible conductor up to 2.5 mm².
- A DC auxiliary voltage of 24 V is required to supply the electronic controls. The auxiliary voltage input must be secured by a HRC fuse size of 250 mA / 250 V/F.

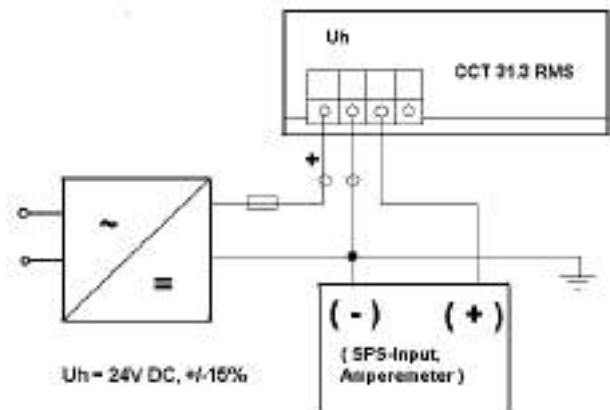

Advantages and benefits of the CCT 31.3 RMS:

- Measuring of direct current as well as alternating current with only one current transformer is possible.
- Exact calculation of the true effective value of any temporal process of the current which is to be measured.
- Large working frequency range from 0 Hz (DC) or 20 Hz...6 kHz (AC).
- High electric protection of the galvanically isolated capture of the measured variable.
- Low power-consumption (≤ 2.5 VA)
- Easy and safety electrical connection by means of spring clamp terminal.
- Direct mounting onto the bus bar by means of integrated fixing screws which are part of the unit.
- Mounting onto 35 mm DIN-rail by means of optional supply of snap-on mounting.
- High climatic and mechanical durability, PU-resin hardened enclosures of all electrical components.

MBS – Wir machen Energie messbar

MBS – We Make Energy Measurable

A central MBS logo is flanked by two columns of icons. On the left, icons represent energy sources: a tree, a sun, a wind turbine, and a power plant. On the right, icons represent consumers: a factory, a house, a car, and a gear icon. Dotted arrows indicate the flow of energy from the sources through the MBS transformer to the consumers.

Auf dem Energieübertragungsweg zwischen Kraftwerk und Verbraucher ist an einer Vielzahl von Messstellen die korrekte Erfassung der Stromstärken notwendig. Dies erfolgt mit Hilfe von Stromwandlern. MBS produziert ein umfangreiches Sortiment an Niederspannungs- und Mittelspannungs-Stromwandlern für Mess- und Schutzzwecke.

When transferring energy from power station to consumer, it is essential to ensure the correct collection of amperages at a multiplicity of measuring points. This is done by means of current transformers. MBS produces an extensive assortment of low- and medium voltage current transformers for measuring and protection purposes.

10 Reasons for MBS

- ✓ Customer oriented solutions
- ✓ Individual consultancy
- ✓ Satisfied customers on all continents
- ✓ A product range in excess of 28,000 units
- ✓ Multiple of international licences and certificates, DIN EN ISO 9001:2000
- ✓ Supreme technical quality
- ✓ Official calibration of current transformers and measuring units
- ✓ Reliability
- ✓ Fast deliveries
- ✓ More than 35 years of success

MBS AG

Eisbachstraße 51 · 74429 Sulzbach-Laufen
Germany

Telefon: +49 7976 9851-0 · Telefax: +49 7976 9851-90
E-Mail: info@mbs-ag.com · Web: www.mbs-ag.com

- Current transformers for industry
- Current transformers for tariff
- Accessories for current transformers
- Medium-voltage CTs
- Bus bar insulators / -supports
- Shunts
- Voltage transformers
- All current sensors
- Measuring transducers
- Energy meters with or without MID approval
- Accessories for energy meters
- Panel board heaters, filter fans, roof fans and control units
